

# Frequently Asked Questions?

**1. How does the surface compare to a real grass lawn?**

Any grass lover will make you aware that in order to maintain natural grass you will need lots of skill, experience, time, money, materials and equipment. With an As Good As Grass synthetic lawn your garden requires no maintenance ensuring you that your time is spent relaxing not on maintaining your garden.

**2. How long does the installation take?**

The duration of an installation varies due to access, ground conditions, site location e.t.c. However we will aim to provide a time frame when you place your order.

**3. Can the area to be covered have contours and undulation?**

Yes, whatever contours and undulation you like.

**4. What about irregular shaped areas and gardens?**

All gardens are custom fitted to individual requirements depending on size and budget. We do offer special offers on set sizes; please see our website for further details at [www.asgoodasgrass.co.uk](http://www.asgoodasgrass.co.uk)

**5. How long will my grass last?**

AGAG grass is basically unaffected by the elements. Our garden grass is UV stabilized and water-resistant. Our surface has been installed in different corners of the world from heavy snow and freezing temperatures to excessive rain and even where they are exposed to heat and direct sun. We offer a warranty against excessive fading, ultra violet exposure and excessive wear.

**6. What about maintenance?**

As Good As Grass hardly needs maintenance. Whereas in summertime natural turf needs maintenance almost every day, you can spend time on other activities instead of having to water or mow the lawn. Also for holiday homes As Good As Grass offer a perfect and economic solution, resulting in lower bills from the local service providers.

**7. Tell me about As Good As Grass the company?**

As Good As Grass are market leaders in artificial grass supply, installation and development. We back up all our products with a minimum 5 year warranty and most products come with a 7 or even 10 year warranty. Quality is our main concern and for that reason we do not allow inferior products into our range whilst still catering for all budgets.

**8. Do I get any guarantees?**

Yes. The surface is installed with a 7 year warranty.

**9. What makes a good artificial grass product?**

Artificial grass has many uses ranging from huge sports areas to small residential back gardens, these different areas require various characteristics such as extreme durability in the example of sports pitches or a soft feel and realistic look in the case of landscaping. Whatever the application work is continually undertaken to ensure the best product is being provided. Of course, one grass will not meet all the necessary requirements, therefore we have developed a diverse product range to meet the demands of any application.

**10. How does water affect the grass?**

The grass has a holed backing allowing water to drain straight through. Rain water naturally cleans the grass and removes any accumulation of dust and dirt.

**11. Is it secure?**

We have various methods to install the surface. Certain installations require the support of pre-treated wood edges or a concrete screed. High impact sports installations require a sand infill and a heavy duty edging such as concrete sets. Events and hire jobs generally require a strong double sided adhesive.

**12. What about seams when installing a number of rolls next to each other?**

Manufacturer recommendations are a 2mm tolerance. A denser surface is easier to seam.

**13. Does it fit in with the natural environment?**

As Good As Grass is specifically designed for residential lawns, urban and commercial landscape design, leisure activities and playgrounds. As Good As Grass delivers a revolutionary and wide range of products that is ideal for all your landscaping needs, offering an unmatched combination of beauty, durability, and value!

**14. Can the kids play on it?**

Yes, we have surfaces that differ in pile height. The taller the pile the softer the lawn or you may choose a short pile surface for ball games. We also have surfaces that have a soft, smooth feel that do not burn the children if they slide.

**15. Is it dog friendly?**

Yes!! The surface has a strong latex backing. We also recommend slightly infilling the grass after installation for additional security.

**16. How do I get a quote?**

Call the office with the measurements of your garden and the sample you like and we will give you a quote over the phone!

**17. Do you offer services for corporate events, exhibitions or functions?**

Yes we do, these are all priced on an individual basis, please see the corporate events section of our website.

**18. Is it environmentally friendly?**

As Good As Grass is working at the forefront of innovative environmental responsibility. The new state-of-the-art production facility where we produce our full range of products (based in the Netherlands), has achieved large reproductions in total organic emissions and non-recyclable waste. Our artificial grass systems have also made significant gains in re-using waste materials, reducing the wasteful use of water and eliminating the use of harmful pesticides, herbicides and other chemicals.

Dear Sir / Madam,

Thank you for your interest in As Good As Grass, the leading manufacturer and installer of synthetic grass.

As Good As Grass has developed a wide range of artificial grass products for landscape, leisure, playgrounds and mini sports, based on 20 years of experience in the synthetic turf industry.

Our manufacturing process ensures that all products conform to the European quality norms. This results in products that are safe for the environment, people and animals. State of the Art tufting machines and coating facilities assure that the products have a lengthy lifespan and fulfill all quality requirements. We are also able to design specific qualities on demand for specific applications.

Furthermore the products can easily be recycled. Please feel free to contact us for any additional information you require! Our customer service will be happy to assist you.

### **Samples**

You may have received many samples in your search for the best product. As market leaders our products attract attention as the "best alternative to natural grass" however this often means we find rivals producing inferior products at a cheaper cost. You therefore may have received very similar yet cheaper products. Check the quality of your grass samples by turning your sample over and observe the gauge (width between each stitch) and the stitch rate (how many stitches per inch). The general rule is that a tighter gauge and a higher stitch rate mean a better quality product. Finally test your samples resilience by applying pressure to them and watch how they react.

### **Summary**

We hope the brochure and price guide provide the information you require. To further your interest in a residential, commercial, educational, event or sports product please contact the office.

**Tel: 0845 22 11 345** or **email: info@asgoodasgrass.co.uk** with details of the area you require synthetically surfacing.
